

Call for Manuscripts

SPACES FOR SPECIES

Invitation for Scientists

We are delighted to extend this invitation to you to participate in this call for manuscripts on the topic :

Biodiversity and Climate Change

including climate change's impact on biodiversity and vice-versa, biodiversity monitoring, ecosystem dynamics, biodiversity threats, conservation and restoration, and biodiversity and human's economy and well being

Widen the reach of your research

Climanosco's mission is to make climate science accessible to everyone. We do this by publishing research articles in the broad area of climate science that are written by researchers and are accessible to a wide audience of non-scientists and non-experts.

Our past calls include topics such as climate change impacts, human responses to climate change, oceans and climate change, and forests and climate change.

This call in biodiversity and climate change is an opportunity for you to share your research with a larger, diverse audience and to help increase public awareness and knowledge of your research area.

The peer-review is led by a science editor and allows for community comments as well as science and accessibility review reports.

Manuscripts shall reflect the state-of-the-art of published research. They are approximately 1500 words long (3 pages), written in a language accessible to the general public. They may include pictures, illustrations, and videos. Manuscripts may be either an introduction to well-established knowledge, a general overview of an area of research, or a more detailed focus on some specific aspects of an area of research. Please read below for more details.

The deadline for the online submission of manuscripts is 1 October 2026.

Please notify us of your intention to participate as soon as possible.

Looking forward to hearing from you,

Your Climanosco team

Additional information

Who can participate?

We welcome participants who

- have published within the past six years, as one of the main authors, an article in a recognized peer-reviewed scientific journal in climate science or an area of science related to the present call for manuscripts; and
- have completed or are enrolled in a master's or doctoral level education in climate science or an area of science related to the present call for manuscripts.

What does it cost?

- Participation is free of charge, including registration, submission, and publication.
- Articles are published in Open Access by Climanosco.

What's the publication process in short?

- One of our science editors will take editorship of your manuscript after submission.
- The manuscript is then peer-reviewed from both science and accessibility angles.
- A pre-print is published in open access in *Climanosco Research Manuscripts*.
- Once accepted for publication, the article will be published in open access in *Climanosco Research Articles*.
- Once published, promotional content will be created and shared with Climanosco's community and beyond across various social media platforms.
- Climanosco may work with artists to create bespoke imagery to include in research articles and will inform and involve authors and editors in this process.
- A printed collection or catalog may be published for this call and shipped on request to the participants for free.

About Climanosco

Climanosco is an independent non-profit organization led by climate scientists and citizens whose mission is to make climate science accessible to everyone (find out more at www.climanosco.org/about/). Climanosco's main goals are:

- Make state-of-the-art climate science free and accessible to everyone;
- Engage citizens in the process of communicating and enhancing climate science;
- Offer scientists a reliable channel for sharing their research with a broad public;
- Provide a direct channel for citizens and scientists to engage in climate science questions.

Contact

- For any questions, contact us at: team@climanosco.org
- Information and updates on this call are available at: www.climanosco.org/call-2026

How to participate

1. Submit your notification of intent

Send us an email as soon as possible with a few words describing the manuscript you intend to submit and a few main references.

Upon receipt of your letter of intent, we expect you to commit to submitting a manuscript by the due date in the area of this thematic call following conditions in section 3 below.

We will be in touch with you within a few days.

2. Register with Climanosco

To access the online submission form and the peer review and publication panels, register as a member at www.climanosco.org/register and check the box « Register as a climate scientist ».

Registration is free of charge. Registration can be cancelled at any time. We require that authors be registered with Climanosco for the duration of the publication process for a successful publication to ensue.

3. Prepare your manuscript

Make sure that you prepare your content as follows:

- The manuscript is composed of:
 - Title
 - Flash outline (max. 110 characters)
 - Outline (max. 200 words)
 - Questions addressed in the manuscript (max. three questions)
 - Body (max. 2500 words; recommended around 1500 words for introductory articles)
- Manuscripts can provide either an introduction to well-established knowledge, a general overview of an area of research, or a focus on specific aspects of an area of research.
- The text and images or videos, if any, are adapted to a broad audience with no prior scientific knowledge.
- The manuscript is based on scientific research that has been published in recognized peer-reviewed journals in the area of climate science or an area of science related to the present call for manuscripts.
- The text of the manuscript is new and original. Images and videos, if any, are either new and original, or appropriate copyrights have been secured.
- We do not accept AI-generated manuscripts.
- As a participant, you are the first author of the manuscript. You can add co-authors to the manuscript as desired. Co-authors do not need to be registered with Climanosco.
- You agree with our [Copyrights notice](#). In particular, copyrights remain with the authors, and articles are published under a Creative Common Attribution License.

For more details on how to prepare your manuscript:

Don't hesitate to contact us at the email address above if you have any questions.

4. Submit your manuscript

Submit your manuscript using our online submission form. The link to the submission form will be available at www.climanosco.org/call-2026 from 1 September 2026.

We will confirm with you within a few days of reception of the manuscript.

Don't hesitate to contact us at the email address above if you encounter any problems.

5. Remarks

We might have to adjust the deadline for the submission of manuscripts depending on the responses we receive.

Manuscripts will be peer-reviewed as editors and reviewers become available. We thank the authors for their patience.

We are extending our editorial and reviewers boards and would welcome nominations from your research team.
